

Whitepaper  
**THE MIDDLE AGE METAVERSE**

# Introduction

TaleCraft is a Gaming NFT project on Avalanche. It is a card game that you can mint NFT by making various crafts with 4 main cards of element and sell these cards on the marketplace. In the TaleCraft, the 4 main elements are given in Alchemist Chests that will be sold weekly. So the cards are limited. It has a deflationary structure in itself. The cards used in each crafting are burnt.

Many NFT projects haven't any use case and these projects do not provide sustainability. People get bored of it after a while and give up on their investments.

TaleCraft allows users to play games with NFTs obtained with tokens and advance to higher levels with craft, distributes rewards to nft holders so that people are always actively involved in the project. in this awesome metaverse members can craft items, trade them and stake their tokens and earn passive income.

# **PHI Token**

The total limited supply of the \$PHI is 12 million and is not mintable.

The \$PHI token is the official token of Talecraft. You can get alchemist chests with \$PHI token per week. You can also trade with the \$PHI token with low fees on the upcoming TaleCraft Marketplace.

In addition, crafting fees will be collected with the \$PHI token.

# **Features**

## **1. Crafting**

Users will open chests with the \$PHI token, one of the 4 elemental NFTs will come out of the chests, and craft the elemental NFTs from the chests to craft NFTs at higher tiers.

## **2. PHI & NFT Deflation**

The PHI token will burn while the chests are opened, the lower level NFTs will be burned while the next tier NFT is crafted, thus keeping the supply constantly limited and decreasing.

## **3. Weekly Burn & Rewards**

\$PHI Tokens that users use when opening chests will be used on;

25% - Add Liquidity \$PHI - \$AVAX

25% - Team Wallet

25% - NFT holders reward as \$AVAX

25% - Burning

# Gameplay

## 1. Philosopher's Stone Token (PHI)

\$PHI is standard token on Avalanche Mainnet. Total limited supply of the \$PHI is 12 million and is not mintable. Members can open alchemist chests with 10 \$PHI + (0,1 AVAX fee) tokens per week. 4 basic element NFTs come out of the chests and can progress to higher level NFTs by crafting these elements

## 2. Alchemist Cards

The types of alchemist cards are initially 150 types. These 150 cards have 5 different tiers. These tiers are respectively iron level, bronze level, silver level, gold level, philosopher's stone level. The levels of the cards are determined by the difficulty and rarity of the card's production. Only 4 out of 150 cards, the 4 main elements, will be available on a weekly basis. All remaining cards can be crafted by users.

### 3. Alchemist Chest

Alchemist's chest is a system where 4 main elements are sold per week. You only need 4 main elements to mint cards in TaleCraft. These are Air-Water-Earth-Fire. These 4 elements are supplied by weekly sales. 25,000 chests are put on sale every week. 1 Chest includes 1 main element NFT 1 Chest Price = 10 \$PHI + 0.1 AVAX fee
